Vanderbilt Assessment of Leadership in Education
Distributed by Discovery Education
Introduction

The Vanderbilt Assessment of Leadership in Education (VAL-ED) principal survey is defined by the intersection of six core components of school performance and six key processes which together make up our conception of principal leadership.

The theory of action underlying our leadership assessment instrument focuses on two key dimensions of leadership behaviors: core components and key processes. Our framework states that school leadership assessment should include measures of the intersection of these dimensions. Does the leadership in the school support teachers to develop a culture of learning and professional behavior? Does the leadership implement programs to ensure there is a culture of learning and professional behavior? Does the leadership communicate effectively about the culture of learning?

The VAL-ED assesses the intersection of what principals must accomplish to improve academic and social learning for all students (the core components), and how they create those core components (the key processes). A substantial research base supports the constructs of the core components and key processes (See Knapp et al., 2003; Leithwood et al., 2004; Murphy et al., 200; Goldring et al., 2007 for recent reviews). Core components refer to characteristics of schools that support the learning of students and enhance the ability of teachers to teach (Marks & Printy, 2003; Sebring & Bryk, 2000). Key processes are leadership behaviors, most notably aspects of transformational leadership traditionally associated with processes of leadership that raise organizational members’ levels of commitment and shape organizational culture (Burns, 1978; Conley & Goldman, 1994; Leithwood, 1994).
